

UJJAWAL SONI

MERN STACK DEVELOPER

Phone: +91 9313477974
Email: ud3679@gmail.com

Address: Surat, Gujarat
Portfolio: www.ujjwalsoni.dev

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience in MongoDB, Express.js, React, and Node.js, focusing on building scalable web applications, secure APIs, and efficient server-side solutions. Skilled in developing responsive front-end interfaces and managing back-end performance to deliver reliable, user-focused products. Experienced in RESTful API integration, authentication (JWT), and database management, with a collaborative mindset and adaptability to fast-paced development environments.

SKILLS

Technical Skills

Core Expertise - JavaScript (ES6+), MERN Stack (MongoDB, Express.js, React, Node.js), server-side development, RESTful APIs, JWT authentication, server handling & optimization

Web Development - HTML5, CSS3, React, Angular, responsive UI/UX design

Databases - SQL Server, MongoDB

Programming Languages - Python, C, C++

Tools & Systems - Git, GitHub, Neovim, SweetAlert2, Unix/Linux

Additional Knowledge - Fundamentals of Artificial Intelligence and Machine Learning, including libraries such as **TensorFlow**, **PyTorch**, **scikit-learn**, **NumPy**, **Pandas**, and **Matplotlib**; understanding of key concepts like supervised and unsupervised learning, neural networks, regression, classification, and model evaluation

Professional Skills - Debugging and troubleshooting complex issues, writing clean and maintainable code, collaborating effectively in Agile environments, participating in code reviews, strong communication with cross-functional teams, adaptability to new technologies, and a problem-solving mindset focused on scalable solutions

ACADEMIC HISTORY

Bhagwan Mahavir University | 2022-2025

Bach. Of Computer Application

S.D.H.R.U.M.S | 2020-2022

Higher Secondary

CERTIFICATIONS

- SSIP
- UNIVERSITY CHESS CHAMPION
- INTERUNI CODING TOURNAMENTS
- HACKATHONS

WEBSITES, PORTFOLIOS, PROFILES

Github - <https://github.com/Bright3679>

Portfolio - <https://project-portfolio-sand-delta.vercel.app>

LANGUAGES

- Gujarati – Native
- Hindi – Fluent / National Language
- English – Fluent

OTHER INTERESTS

- Linux & System Exploration
- Chess & Strategic Games
- Open-Source Contributions
- Automotive Technology Insights

WORK EXPERIENCE

FastWhistle Logistics - Backend Developer - Duration: 8 Months + 4 Months (internship)

During my 8-month internship at **FastWhistle Logistics**, I gained hands-on experience in backend development and system integration within a real-world logistics environment. I was responsible for developing and maintaining server-side logic using Node.js and Express.js, ensuring that the backend services were scalable, efficient, and reliable. I integrated SQL Server databases for optimized data storage, retrieval, and management.

I implemented authentication and authorization mechanisms using JWT, ensuring secure access to application resources. Collaborating closely with frontend developers, I ensured seamless integration of backend services with the user interface, contributing to a smooth and cohesive application experience. Additionally, I gained extensive exposure to Linux-based operating systems, working daily with Arch Linux, Debian, Kali, and Garuda, and building proficiency across more than 50 Linux environments. This allowed me to efficiently deploy applications, manage servers, and troubleshoot system-level issues.

Key Responsibilities & Achievements :

- **Developed** and maintained server-side logic using **Node.js and Express.js**.
- **Integrated** and managed **SQL Server databases** for secure and optimized data handling.
- **Implemented JWT-based authentication** and authorization for secure access control.
- Collaborated with frontend developers to ensure seamless backend-frontend integration.
- Gained expertise in **Linux** environments, including daily work with multiple distributions.
- Contributed to **logistics**-focused projects, improving backend efficiency and process **workflows**.

5SigmaIT - PagarGuru - IT Support Executive - Duration: 1 year

Worked as an IT Support Executive at Pagarguru, a company providing HRMS, CRM, and Payroll software solutions. Responsible for delivering technical support to clients and internal users, including communication with international clients to resolve software issues, bugs, and system-related queries. Provided support for admin panel operations, ensuring proper system configuration, user access management, and smooth functionality. Assisted in troubleshooting payroll, HRMS, and CRM system issues, and coordinated with the development team to improve system performance. Contributed to implementing operational policies and ensured efficient software usage through effective problem-solving, decision-making, and client support.

Key Responsibilities & Achievements :

- Provided **technical support for HRMS, CRM, and Payroll software** to clients and internal users.
- Communicated with *international clients* to resolve technical issues, bugs, and system queries.
- Supported admin panel operations, including **user management, configurations, and access control**.
- **Troubleshot payroll, attendance, employee data, and system-related issues** efficiently.
- Identified and reported software bugs, and coordinated with developers for timely resolution.
- **Assisted** clients in understanding software features and ensured smooth system usage.
- Helped implement system rules, policies, and operational procedures.
- Ensured **smooth daily operations** and improved **client satisfaction** through timely support.

PROJECTS - SHOWCASE - CORPORATE AND FREELANCING PROJECTS

Sales CRM

Built a CRM platform for sales teams to manage leads, track pipelines, and generate analytics dashboards. The system allows role-specific access and optimized workflow for sales operations, helping teams close deals faster and track conversions effectively.

Key Features -

- Lead and sales pipeline management
- Role-specific dashboards for performance tracking
- Analytics and reporting for team metrics
- Secure authentication and access control

Tech Stack - MERN Stack, JWT, RESTful APIs

Perfume E-Commerce Website

A freelance e-commerce project with two panels (Admin and User) enabling inventory management and online shopping. Admins manage products and orders, while users browse items, add to cart, and make purchases. Integration with WhatsApp provides instant customer support, improving user experience and engagement.

Key Features -

- Admin panel for product, inventory, and order management
- User panel for browsing, purchasing, and tracking orders
- WhatsApp integration for customer support
- Fully responsive UI for mobile and desktop

Tech Stack - MERN Stack, RESTful APIs, JWT Authentication, Vercel & Render

Task Management Software

Developed a desktop productivity application using Electron and Vanilla JavaScript. The software focuses on time management and task prioritization, allowing users to efficiently track tasks, set deadlines, and receive alerts to stay productive.

Key Features -

- Task creation, assignment, and deadline management
- Time tracking tools for productivity monitoring
- Alerts and notifications for timely completion
- Simple and intuitive GUI for ease of use

Tech Stack - Electron, Vanilla JavaScript, HTML5, CSS3

Face Detection and Recognition Program

Built a real-time face detection and recognition system to support security and identification workflows. The system leverages YOLOv8 for object detection and deep learning models for face recognition, visualizing results with bounding boxes and labels.

Key Features -

- Real-time face detection from images and video feeds
- High-accuracy recognition using deep learning models
- Visualization with bounding boxes and labels

Tech Stack - Python, YOLOv8, OpenCV, dlib, NumPy, PyTorch

ZeroMeds Automation Bot

Developed as an automation middleware to bridge pharmaceutical software and ERP systems, ZeroMeds eliminates manual data entry and automates repetitive workflows. The bot is designed to handle multiple windows, perform data extraction and entry, and provide an easy-to-use GUI for clients. It significantly reduced manual effort, minimized errors, and improved operational efficiency for pharmaceutical businesses.

Key Features -

- Automated data transfer between pharmaceutical software and ERP systems
- Multi-threaded operation for handling concurrent tasks
- GUI interface for user controls and monitoring
- Error handling to ensure reliable operations

Tech Stack - Python, PyAutoGUI, Tkinter, PyGetWindow, Threading

Support CRM (PagarGuru)

A full-stack MERN application developed for PagarGuru to manage internal support team operations. It streamlines task assignments, lead tracking, and role-based access for Admins and Employees. The system is hosted on Vercel and Render and features a responsive interface for desktop and mobile devices. It improved internal workflows, reduced response time, and enhanced lead tracking efficiency.

Key Features -

- Role-based access: Admin and Employee models
- Task assignment, progress tracking, and notifications
- Lead management and reporting dashboards
- Real-time updates and responsive design

Tech Stack - MongoDB, Express.js, React, Node.js, RESTful APIs, JWT Authentication
